EDUCATION

HKBK college of Engineering

Bachelors of Engineering, Computer Science

CGPA: 6.3

Bengaluru, Karnataka, IN

August 2017 - August 2022

Raj kumar Academy

High School, Science

Percentage: 66.4%

Lucknow, Uttar Pradesh, IN

April 2014 - May 2015

Raj Kumar Academy

Secondary high School Science

Lucknow, Uttar Pradesh, IN

April 2016 - June 2017

SKILLS

Programming Languages: Java, Javascript, C, HTML, Data Structures

Libraries/Frameworks: Bootstrap, Next.js, Tailwind CSS, Material UI, Express.js, Vite, React.js, JSON, JSON Web Token, Redux, Axios

Tools / Platforms: Node.js, GitHub, RESTful APIs, Git, Linux, VS Code, Figma

Databases: MySql, MongoDB, Database management System, SQL

PROJECTS / OPEN-SOURCE

Frozen food management system

HTML, CSS, Javascript, Bootstrap, SQL, Apache Server

This project is based on the Database Management System. The main objective of frozen foods is to develop a reliable, convenient, and accurate Ordering System. I have used MySql to manipulate the database for this project. It's a Front-end development for the restaurant.

Maths Quiz | [Link](#)

React, Redux, Javascript, CSS, & VS code

Maths Quiz is a quiz app for solving mathematic problems. Score detection functionality. Three lives for a player & a limited duration to solve. The more you solve the harder problems will come & you'll get more lives to maintain the streak.

My Amazon Music | [Link](#)

React, Node.js, JWT, Javascript, Tailwind CSS, & VS code

With this project, I was aiming to create a Web application similar to Amazon Prime Music.

This web application has features like Podcasts, and search music according to your MOOD or your favorite ARTISTS, the Subscription model is there for extra features like no ads, unlimited downloads, & many more.

Salt Lick | [Link](#)

React, Javascript, Firebase, Tailwind CSS, & VS code

Salt Lick is a web application that is used to order food online. It's a web application for a restaurant named Salt Lick which is a multi-cuisine restaurant specializing in Indian, Mughlai, Chinese, and Continental. It's a Front-end development for the restaurant where you can create your account and place an order for the food.
